DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114.

Applicant's submission filed on 09-23-04 has been entered.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35

U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over **Baader et. al.** (US 5,130,317). On column 1, Baader et. al. disclose a genus of formula I which renders obvious a few compounds recited in the instant claim 7. Then, on column 7, Baader et. al. disclose the compound of *Pyrimidine-4,6-dicarboxylic acid dibenzylamide* (see Example 2), which the common core of some compounds in the instant claim 11 (for example, 13th, 15th and 16th compounds). The disclosed compound differs from the claimed compounds by not having substituent(s). However, the genus of formula I on column 2 allows for substitution on the *benzyl* ring (or R¹). Since the list of substituents on R¹ was limited to only five groups, the equivalent teaching would provide the motivation for one of the ordinary skilled in the art to select compounds having a substituted benzyl ring such as those claimed herein. Therefore, at the time of the invention, it would have been obvious for one skilled in the art to select the above compounds of claim 11 because one would have expected them to inhibit proline hydroxylase and lysine hydroxylase as taught by Baader et. al.

Status of Claims 9, 15, and 22-24

3. Claims 9, and 22-24 appear to be free of prior art. Claim 15 is currently withdrawn.

Information Disclosure Statement

4. The information disclosure statement (IDS) submitted on 9-23-04. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.
